

# New from Indian... two-wheeled excellence.

Performance, quality and reliability are what these motorcycles are all about. Built to exacting standards to meet the needs of the American enthusiast, these two stroke machines are proving their superiority on the race courses of America as they have for years in Europe. A

carefully selected combination of winning components, these motorcycles are gathering trophies at every turn. Power, handling and dependability add up to trail riding excellence or tear-em-up competition wins. Ride one . . . they tell their own story.

1. Mini Mini is 18" high, weighs only 57 pounds. 48 c.c. of miniaturized motorcycle with automatic drive and full front and rear suspension. Governed for 10-12 miles per hour but can do more. A 'gem' that must be seen to be believed.
2. A 50 c.c. Scrambler mini-cycle for the mini-bike graduate. Four speed gear box and full suspension for 105 pounds of easy handling for racing or trailing.
- 3 & 4. Bobcats a pair — the ultimate mini-bike — 50 c.c. and 100 c.c. of superb handling and precision engineering. Big motorcycle features in a compact package combining four speed transmission, full suspension and obvious attention to detail. Two-wheeled family fun for everyone.
5. Top of the line. Designed and built to win. 100 c.c. of pure performance in a racer's delight. Tartarini frame, Italian suspension and unbelievable brakes make this machine a must for the serious competitor. 160 pounds of ready-to-go motorcycle is waiting for you.
