ME-125 With 60W Magnito Assembly

The new ME-125 with the 60 W electrical system uses the same battery assembly (Part Number 11105058) as previous ME-100/125's, but the 10 A fuse that is attached to the battery is not connected to the electrical system as on other model Indian Motorcycles. Reference to illustration #1 for proper connection of the battery to the ME-125 wiring system. Reference to SVB-176 for complete electrical system wiring diagrams and test information.
